Executive summary

LinkedIn Ireland Unlimited Company (“LinkedIn Ireland”) – the provider of LinkedIn’s services in the European Union (EU) – welcomes the opportunity to file this report on our compliance with the commitments and measures of the Code of Conduct on Disinformation (the “Code”) that we subscribed to in our Subscription Document dated 15 January 2025. This report covers the period from 1 January to 30 June 2026 (the “Reporting Period”).

LinkedIn’s vision is to create economic opportunity for every member of the global workforce. Its mission is to connect the world’s professionals to make them more productive and successful. LinkedIn is a networking tool that enables members to establish their professional identities online, connect with other professionals, and build relationships for the purpose of collaborating, learning, and staying informed about industry information and trends. As such, the design and function of the platform are central to its overall risk profile, which they shape in a few key ways:

- LinkedIn is a real-identity platform, where members must use their real or preferred *professional* names, and the content they post is visible, for example, to their colleagues, employers, potential future employers, and business partners. Given this audience, members by and large tend to limit their activity to professional areas of interest and expect the content they see to be professional in nature.
- LinkedIn operates under standards of professionalism, which are reflected both in content policies and enforcement, as well as in content prioritisation and amplification. LinkedIn’s policies bolster a safe, trusted, and professional platform, and LinkedIn strictly enforces them. LinkedIn strives to broadly distribute high-quality content that advances professional conversations on the platform.
- Throughout the product development lifecycle, LinkedIn’s Digital Safety function ensures a “safety by design” approach that is tailored to its unique user base of professionals and businesses. The Digital Safety function partners with the relevant product and engineering organizations to conduct continuous assessments of risks and address threats prior to product launch, taking into account the specific needs and vulnerabilities of the platform’s user base. As part of this approach, LinkedIn also evaluates how the platform’s own design choices and functionality may introduce or amplify certain risks.
- LinkedIn services are tailored toward professionals and businesses, and LinkedIn’s Professional Community Policies clearly detail what is expected of every member as they post, share and comment on the platform, including that disinformation is not permitted on LinkedIn.

LinkedIn is committed to keeping its platform and services safe, trusted, and professional and to providing transparency to its members, the public, and to regulators. Members come to LinkedIn to find a job, stay informed, connect with other professionals, and learn new skills. As a real-identity online networking service for professionals to connect and interact with other professionals, LinkedIn has a unique risk profile when compared with many social media platforms. With this in mind, LinkedIn continues to invest in numerous Trust domains to proactively enhance the safety, security, privacy, and quality of the LinkedIn user experience. Further, as confirmed by LinkedIn’s Systemic Risk Assessments conducted to date, the residual risks most relevant to misinformation and disinformation (i.e. those relating to Civic Discourse and Electoral Process, Public Health and Public Security) are categorised as “Low” or “Minimal”.

Unless stated otherwise, data provided under this report covers a reporting period of 1 January to 30 June 2026 (“Reporting Period”).

II. Scrutiny of Ad Placements

Commitments 1 - 3

II. Scrutiny of Ad Placements	
Commitment 1	
Relevant signatories participating in ad placements commit to defund the dissemination of disinformation, and improve the policies and systems which determine the eligibility of content to be monetised, the controls for monetisation and ad placement, and the data to report on the accuracy and effectiveness of controls and services around ad placements	
In line with this commitment, did you deploy new implementation measures (e.g. changes to your terms of service, new tools, new policies, etc)? [Yes/No]	No
If yes, list these implementation measures here [short bullet points].	New implementation Measures Not applicable
Do you plan to put further implementation measures in place in the next 6 months to substantially improve the maturity of the implementation of this commitment? [Yes/No]	No
If yes, which further implementation measures do you plan to put in place in the next 6 months?	Planned Implementation Measures Not applicable. However, LinkedIn plans to continue to assess its policies and services and to update them as warranted.
Measure 1.1	Not subscribed
Measure 1.2	Not subscribed
Measure 1.3	
QRE 1.3.1	LinkedIn provides a range of information and tools to give advertisers transparency and control regarding the placement of their advertising. For example, LinkedIn publishes for the public and advertisers a semiannual transparency report pursuant the DSA, which discloses metrics regarding the amount of violating member content, including misinformation, that LinkedIn removed from the platform during the period. LinkedIn's most recent DSA transparency report is available here. For ads on the LinkedIn Audience Network, LinkedIn provides tools to assist advertisers in controlling where their ads appear within the network. For example, advertisers can review the list of publishers within the network and create custom allow lists and block lists to ensure their ads are placed on apps and sites that meet an advertiser's specific standards.

Measure 1.4	Not subscribed
Measure 1.5	Not subscribed
Measure 1.6	Not subscribed

II. Scrutiny of Ad Placements	
Commitment 2	
Relevant Signatories participating in advertising commit to prevent the misuse of advertising systems to disseminate Disinformation in the form of advertising messages.	
In line with this commitment, did you deploy new implementation measures (e.g. changes to your terms of service, new tools, new policies, etc)? [Yes/No]	No
If yes, list these implementation measures here [short bullet points].	New implementation Measures Not applicable
Do you plan to put further implementation measures in place in the next 6 months to substantially improve the maturity of the implementation of this commitment? [Yes/No]	No
If yes, which further implementation measures do you plan to put in place in the next 6 months?	Planned Implementation Measures Not applicable. However, LinkedIn plans to continue to assess its policies and services and to update them as warranted.
Measure 2.1	
QRE 2.1.1	LinkedIn prohibits misinformation and disinformation on its platform, whether in the form of organic content or in the form of advertising content. LinkedIn's Professional Community Policies, which apply to all content on the platform, expressly prohibit false and misleading content, including misinformation and disinformation: - Do not share false or misleading content: Do not share content that is false, misleading, or intended to deceive. Do not share content to interfere with or improperly influence an election or other civic process. Do not share synthetic or manipulated media that depicts a person saying something they did not say or doing something they did not do without clearly disclosing the fake or altered nature of the material. Do not share content that directly contradicts guidance from leading global health organizations and public health authorities;

	including false information about the safety or efficacy of vaccines or medical treatments. Do not share content or endorse someone or something in exchange for personal benefit (including personal or family relationships, monetary payment, free products or services, or other value), unless you have included a clear and conspicuous notice of the personal benefit you receive and have otherwise complied with our Advertising Policies. We don't allow political advertisements, endorsements, or support posted in exchange for money or personal benefit. LinkedIn provides specific examples of false and misleading content that violates its policy via a Help Center article on False or Misleading Content. LinkedIn's Advertising Policies incorporate the Professional Community Policies provision, and similarly prohibit misinformation and disinformation.			
SLI 2.1.1 – Numbers by actions enforcing policies above	Methodology of data measurement: The table below reports the number of ads LinkedIn restricted under the misinformation policy in QRE 2.1.1 above between 1 January – 30 June 2026, broken out by EEA Member State. The metrics are assigned to EEA Member State based on the primary country targeting of the ad. The following factors may contribute to the number of ads reported by LinkedIn being low: - LinkedIn is primarily a business-to-business advertising platform - that is, businesses marketing their products and services to other businesses and members in a professional capacity. - Because of the business-to-business nature of LinkedIn's advertising platform, ads on LinkedIn may cost more than ads placed in other settings, impacting the ads run on LinkedIn.			
	The number of ads LinkedIn restricted under the misinformation policy in QRE 2.1.1 between 1 January - 30 June 2026	Type of Action 2 [linked to the policy mentioned in QRE]	Type of Action 3 [linked to the policy mentioned in QRE]	Type of Action 4 [linked to the policy mentioned in QRE]

Measure 2.2	Not subscribed	
Measure 2.3		
QRE 2.3.1	All advertising that runs on LinkedIn's platform is subject to LinkedIn's Advertising Policies. LinkedIn has implemented both automated and manual systems to help ensure that advertising on the platform complies with its Advertising Policies, and that ads that do not comply with its policies are removed. When an advertiser submits an advertising campaign, the campaign is evaluated by LinkedIn automated systems. If those systems determine a campaign may violate LinkedIn's policies, the campaign is rejected or forwarded to LinkedIn's advertising review team for manual review. The advertising review team is trained in LinkedIn's Advertising Policies and dedicated to advertising review. LinkedIn also employs a dedicated team of trainers, who not only support the onboarding of new ad reviewers, but also provide ongoing educational opportunities for reviewers. LinkedIn similarly employs quality assurance analysts, who provide one-on-one coaching, as well as regular monthly forums to discuss reviewers' most frequent challenges. For complex issues, reviewers have direct access to global advertising policy managers through regular office hours and dedicated escalation pathways. LinkedIn members may also report ads that they believe violate LinkedIn's advertising policies, and when members report ads LinkedIn's advertising review team reviews them. To report an ad, members can click on the three-dot icon in the upper right-hand corner of every ad and select the reporting option. Members are then directed to select a reporting reason, with "Misinformation" provided as a reporting option.	
SLI 2.3.1	Methodology of data measurement: The table below reports metrics concerning ads LinkedIn restricted under the misinformation policy in QRE 2.1.1. The metrics include: (1) the number of ads LinkedIn restricted under the misinformation policy in QRE 2.1.1 between 1 January - 30 June 2026, broken out by EEA Member State; (2) the number of impressions those ads received before they were restricted. The metrics are assigned to EEA Member States based on the primary country targeting of the ad. The following factors may contribute to the number of ads reported by LinkedIn being lower than other platforms: - LinkedIn is primarily a business-to-business advertising platform – that is, businesses marketing their products and services to other businesses and members in a professional capacity. - Because of the business-to-business nature of LinkedIn's advertising platform, ads on LinkedIn may cost more than ads on other platforms, impacting the ads run on LinkedIn.	
	The number of ads LinkedIn restricted under the misinformation policy in QRE 2.1.1 between 1 January – 30 June 2026	The number of impressions the ads received before they were restricted

Measure 2.4		
QRE 2.4.1	When LinkedIn restricts an ad for violation of its policies, as described in QRE 2.3.1, LinkedIn sends a notice to the advertiser regarding the restriction. The notice provides the advertiser information about the restriction, including the advertising policy that the ad violated.	
	The notice also provides the advertiser information regarding how they can appeal LinkedIn's decision, and provides a link to initiate an appeal.	
SLI 2.4.1	Methodology of data measurement:	
	The table below reports metrics concerning appeals of the ads LinkedIn restricted under its misinformation policy. The metrics include: (1) the number of ad restrictions in SLI 2.3.1 that were appealed between 1 January - 30 June 2026; and (2) the number of those appeals that were granted (i.e. that led to a change of the initial decision). The metrics are assigned to EEA Member States based on the primary country targeting of the ad.	
	As reported in SLI 2.3.1, because no ads were restricted under the misinformation policy in QRE 2.1.1 between 1 January - 30 June 2026, there were no appeals during the reporting period.	
	The number of appeals of ad restrictions in SLI 2.3.1 between 1 January – 30 June 2026	The number of appeals that were granted

II. Scrutiny of Ad Placements

Commitment 3 – *Not subscribed*

III. Political Advertising

Commitments 4 - 13

III. Political Advertising
Commitment 4 – <i>Not subscribed</i>

III. Political Advertising
Commitment 5
Relevant Signatories commit to apply a consistent approach across political and issue advertising on their services and to clearly indicate in their advertising policies the extent to which such advertising is permitted or prohibited on their services.
In line with this commitment, did you deploy new implementation measures (e.g. changes to your terms of service, new tools, new policies, etc)? [Yes/No]
No
If yes, list these implementation measures here [short bullet points].
New implementation Measures
Not applicable
Do you plan to put further implementation measures in place in the next 6 months to substantially improve the maturity of the implementation of this commitment? [Yes/No]
No
If yes, which further implementation measures do you plan to put in place in the next 6 months?
Planned Implementation Measures
Not applicable as LinkedIn prohibits political advertising, as outlined under QRE 5.1.1.

Measure 5.1	
QRE 5.1.1	LinkedIn’s Advertising Policies do not allow political advertising, and LinkedIn has not allowed political advertising since 2018. In the European Union, we do not allow political advertising as defined by Regulation (EU) 2024/900. LinkedIn’s Advertising Policies, which all advertisers are bound by and which are incorporated into the LinkedIn Ads Agreement, state: Political. Political ads are prohibited, including ads advocating for or against a particular candidate, party, ballot proposition, law, regulation, or otherwise intended to influence an election outcome; ads fundraising for or by political candidates, parties, political action committees or similar organizations, or ballot propositions; and ads exploiting a sensitive political issue even if the advertiser has no explicit political agenda. In Brazil, we also do not allow political-electoral content as defined by TSE Resolution 23732/2024. In the European Union, we do not allow political advertising as defined by Regulation (EU) 2024/900. Learn more. LinkedIn also makes available a Help Center article with more information regarding its policy regarding political advertising in the European Union.

III. Political Advertising
Commitment 6 - <i>Not subscribed</i>

III. Political Advertising	
Commitment 7	
Relevant Signatories commit to put proportionate and appropriate identity verification systems in place for sponsors and providers of advertising services acting on behalf of sponsors placing political or issue ads. Relevant signatories will make sure that labelling and user-facing transparency requirements are met before allowing placement of such ads.	
In line with this commitment, did you deploy new implementation measures (e.g. changes to your terms of service, new tools, new policies, etc)? [Yes/No]	No
If yes, list these implementation measures here [short bullet points].	New implementation Measures Not applicable
Do you plan to put further implementation measures in place in the next 6 months to substantially improve the maturity of the implementation of this commitment? [Yes/No]	No
If yes, which further implementation measures do you plan to put in place in the next 6 months?	Planned Implementation Measures Not applicable

Measure 7.1	Not subscribed
Measure 7.2	Not subscribed
Measure 7.3	
QRE 7.3.1	As set out in QRE 5.1.1, LinkedIn's Advertising Policies prohibit political advertising. Before submitting a campaign, advertisers must agree that their ad complies with LinkedIn's policies. For ads targeting the European Union, LinkedIn provides a mechanism for advertisers to self-identify whether their advertisement constitutes political advertising. If an advertiser declares that their advertisement constitutes political advertising, LinkedIn rejects it. As detailed in QRE 2.3.1, LinkedIn has implemented both automated and manual systems to help ensure that advertising on the platform complies with its Advertising Policies, and that ads that do not comply with its policies are removed. These enforcement systems apply equally to prohibited political advertising, as well as other violations of LinkedIn's Advertising Policies. In addition to LinkedIn's pre-emptive enforcement, LinkedIn users may also report ads that they believe violate LinkedIn's advertising policies or the law. Users may report ads using either LinkedIn Article 16 notice and action mechanism under the Digital Services Act, or may report ads in product by clicking on the three-dot icon in the upper right-hand corner of every ad and selecting the reporting option.
QRE 7.3.2	As set out in QRE 5.1.1, LinkedIn's Advertising Policies prohibit political advertising. Ads that do not comply with LinkedIn's Advertising Policies are removed. As stated in LinkedIn's Advertising Policies, advertisers that repeatedly violate LinkedIn's policies, including by repeatedly failing to self-identify political advertising, may be restricted.
Measure 7.4	Not subscribed

III. Political Advertising

Commitment 8 - **Not subscribed**

III. Political Advertising

Commitment 9 - **Not subscribed**

III. Political Advertising

Commitment 10 - **Not subscribed**

III. Political Advertising
Commitment 11 - <i>Not subscribed</i>

III. Political Advertising
Commitment 12 - <i>Not subscribed</i>

III. Political Advertising
Commitment 13 - <i>Not subscribed</i>

IV. Integrity of Services

Commitments 14 - 16

IV. Integrity of Services
Commitment 14 - <i>Not subscribed</i>

IV. Integrity of Services	
Commitment 15	
Relevant Signatories that develop or operate AI systems and that disseminate AI-generated and manipulated content through their services (e.g. deep fakes) commit to take into consideration the transparency obligations and the list of manipulative practices prohibited under the proposal for Artificial Intelligence Act.	
In line with this commitment, did you deploy new implementation measures (e.g. changes to your terms of service, new tools, new policies, etc)? [Yes/No]	No
If yes, list these implementation measures here [short bullet points].	New implementation Measures Not applicable.
Do you plan to put further implementation measures in place in the next 6 months to substantially improve the maturity of the implementation of this commitment? [Yes/No]	No
If yes, which further implementation measures do you plan to put in place in the next 6 months?	Planned Implementation Measures Not applicable. However, LinkedIn will continue to assess its policies and services and to update them as warranted.
Measure 15.1	

QRE 15.1.1	During the reporting period, LinkedIn continued to support and launch products and features that disseminate, and enable LinkedIn members to disseminate, AI-generated content. LinkedIn also continues to integrate generative AI-powered features into existing products. To mitigate the potential safety risks posed by such features, LinkedIn has in place and continues to augment policies and procedures to ensure that our AI systems, including any new features are consistent with LinkedIn's Responsible AI Principles and applicable law. 1. Privacy and Security – LinkedIn has an existing process for assessing the privacy and security of new products and initiatives, which has been augmented to recognize particular risks arising from the use of generative AI. With respect to generative AI, additional considerations include being thoughtful about the personal data used in prompt engineering and ensuring that members maintain full control of their profiles. 2. Safety – LinkedIn has an existing process for assessing the safety of new products and initiatives, that has been augmented to recognize particular risks with generative AI. New features are carefully ramped to members and rate limits are introduced to reduce the likelihood of abuse. Limiting access allows us to watch for issues that may arise. We aim to proactively identify how prompts could be misused to then mitigate potential abuse. We engage in proactive content moderation (all AI generated content is held to the same professional bar as other content on the LinkedIn platform), through applying content moderation filters to both the member inputs for prompts and the output. We also engage in reactive content moderation, through provision of member tools to report policy-violating issues with the content. Additional features have been added to these tools that address generative AI-specific issues such as 'hallucinations.' Additionally, all generative AI-powered features that have outputs that are directly visible to LinkedIn users, go through (1) "red teaming," to test the generative AI-powered feature and/or model and to identify and mitigate any vulnerabilities, and (2) quality assurance assessments on response quality, accuracy, and hallucinations with the goal to remediate discovered inaccuracies. 3. Fairness and Inclusion – LinkedIn has a cross functional team that designs policy and process to proactively mitigate the risk that AI tools, including generative AI tools, perpetuate societal biases or facilitate discrimination. To promote fairness and inclusion, we target two key areas - content subject and communities. With respect to content subjects, prompts are engineered to reduce the risk of biased content, blocklists are leveraged to replace harmful terms with neutral terms, and member feedback is monitored to learn and improve. With respect to communities, in addition to a focus on problematic content like stereotypes, we are working to expand the member communities that are served by our generative AI tools. Additionally, LinkedIn continues to invest in methodologies and techniques to more broadly ensure
-------------------	---

	algorithmic fairness. 4. Transparency – LinkedIn is committed to being transparent with members. With respect to generative AI products and features, our goal is to educate members about the technology and our use of it such that they can make their own decisions about how to engage with it. Additionally, LinkedIn labels media containing industry-leading “Content Credentials” technology developed by the Coalition for Content Provenance and Authenticity (“C2PA”), including AI-generated content containing C2PA metadata. Content Credentials on LinkedIn show as a “Cr” icon on images and videos that contain C2PA metadata, particularly on highly visible surfaces such as the feed. By clicking the icon, LinkedIn members can trace the origin of the AI-created media, including the source and history of the content, and whether it was created or edited by AI. Additionally, LinkedIn provides members with information on how their personal data is used for generative AI in the LinkedIn Help Center, including how personal data is used for content generating AI model training. As of November 3, 2025, when a LinkedIn Terms of Service update became effective, LinkedIn can use some data from members in the EU and EEA to train content-generating AI models. Members can opt out at any time via their member settings. 5. Accountability – In addition to the privacy, security, and safety processes discussed above, for AI tools we have additional assessments of training data and model cards so we can more appropriately assess risks and develop mitigations for the AI models that support our AI products and initiatives.
Measure 15.2	
QRE 15.2.1	With respect to the algorithms used for detection, moderation, and sanctioning of impermissible conduct and content, please see: • QRE 15.1.1 (policies for countering prohibited manipulative practices in AI systems); and • QRE 18.2.1 (policies and procedures to limit spread of harmful false or misleading information).

IV. Integrity of Services	
Commitment 16	
Relevant Signatories commit to operate channels of exchange between their relevant teams in order to proactively share information about cross-platform influence operations, foreign interference in information space and relevant incidents that emerge on their respective services, with the aim of preventing dissemination and resurgence on other services, in full compliance with privacy legislation and with due consideration for security and human rights risks.	
In line with this commitment, did you deploy new implementation measures (e.g. changes to your terms of service, new tools, new policies, etc)? [Yes/No]	No
If yes, list these implementation measures here [short bullet points].	New implementation Measures Not applicable
Do you plan to put further implementation measures in place in the next 6 months to substantially improve the maturity of the implementation of this commitment? [Yes/No]	Yes
If yes, which further implementation measures do you plan to put in place in the next 6 months?	Planned Implementation Measures We look forward to continuing to work on this commitment with the other signatories as we develop further cross-platform information sharing.
Measure 16.1	

QRE 16.1.1	LinkedIn has channels of exchange with numerous partners to facilitate the flow of information to tackle purveyors of disinformation, including disinformation spread by state-sponsored and institutional actors. LinkedIn has a Nation State Threat program to account for state-sponsored malign actor relationships to content on the platform. LinkedIn’s team of threat investigators and intelligence analysts has channels of exchange with peers and other stakeholders, including our AI modelling team, to identify and remove nation-state actors and coordinated inauthentic campaigns. LinkedIn conducts investigations into election-related influence operations and nation-state targeting including continued information sharing on threats with industry peers and Law Enforcement, as appropriate. LinkedIn has channels of exchange with peer companies and other stakeholders to receive and share indicators related to fake accounts created by state-sponsored actors, such as confirmed Tactics, Techniques, and Protocols (TTPs) and Indicators of Compromise (IOC). This exchange of information leads to a better understanding of the incentives of sophisticated and well-funded threat actors and how they evolve their TTPs to achieve those goals, which assists LinkedIn in their identification and removal. Any associated disinformation content is verified by our internal or external fact-checkers as needed, and coordinated inauthentic behaviours (CIBs) are also removed by our Threat Prevention and Defense team. LinkedIn is heavily involved in threat exchanges. These threat exchanges take various forms, such as: 1) channels of exchange amongst industry peers to discuss high-level trends and campaigns; and, 2) one-on-one channels of exchange with individual peer companies to discuss TTPs and IOCs. This exchange of information leads to a better understanding of the incentives of sophisticated and well-funded threat actors and how they evolve their TTPs to achieve those goals, which assists us in their identification and removal. LinkedIn always stands ready to receive and investigate any leads we receive from peers and other external stakeholders. In addition to one-on-one channels of exchange with peers, we also, as appropriate, consume intelligence from vendors and investigate any TTPs and IOCs made available in peer disclosures. In turn, we also regularly release information about policy-violating content on our platform in publicly available transparency reports and blog posts. LinkedIn also notes that the Elections Rapid Response System was activated for relevant elections in Portugal, Slovenia, Denmark, Bulgaria, Hungary, Cyprus and Malta.		
SLI 16.1.1 – Numbers of actions as a result of information sharing	We look forward to providing reports where appropriate in future reporting periods.		
Measure 16.2	Nr of actions taken (total)	Type of detected content	Other relevant metrics

QRE 16.2.1	We look forward to providing qualitative examples and case studies where appropriate in future reports.

V. Empowering Users

Commitments 17 - 25

V. Empowering Users
Commitment 17 - <i>Not subscribed</i>

V. Empowering Users	
Commitment 18	
Relevant Signatories commit to minimise the risks of viral propagation of Disinformation by adopting safe design practices as they develop their systems, policies, and features.	
In line with this commitment, did you deploy new implementation measures (e.g. changes to your terms of service, new tools, new policies, etc)? [Yes/No]	No
If yes, list these implementation measures here [short bullet points].	New Implementation Measures Not applicable
Do you plan to put further implementation measures in place in the next 6 months to substantially improve the maturity of the implementation of this commitment? [Yes/No]	No
If yes, which further implementation measures do you plan to put in place in the next 6 months?	Planned Implementation Measures Not applicable. However, LinkedIn will continue to assess its policies and services and to update them as warranted.
Measure 18.1	<i>Not subscribed</i>
Measure 18.2	

QRE 18.2.1	LinkedIn is an online professional network. On LinkedIn, the world's professionals come together to find jobs, stay informed, learn new skills, and build productive relationships. The content that our members share becomes part of their professional identity and can be seen by their boss, colleagues, and potential business partners. Accordingly, the content on LinkedIn is professional in nature. To help keep LinkedIn safe, trusted, and professional, our Professional Community Policies clearly detail the range of objectionable and harmful content that is not allowed on LinkedIn. Fake accounts, misinformation, and inauthentic content are not allowed, and we take active steps to remove it from our platform. LinkedIn removes "specific claims, presented as fact, that are demonstrably false or substantially misleading and likely to cause harm." This approach applies globally and is used for purposes of content moderation and for publicly reporting figures on misinformation. Specific examples of what might constitute misinformation can be found here in our Help Center. As part of our User Agreement, our Professional Community Policies are accepted by every member when joining LinkedIn and are easily available to every member. LinkedIn creates value and preserves trust by fostering a safe, trusted, and professional platform, while honouring members' professional expression and speech. LinkedIn enables healthy on-platform conversations by facilitating the removal of misinformation that threatens its members' safety and creates barriers to their engagement on LinkedIn. When speech does not conclusively cross the boundaries set by LinkedIn policies, LinkedIn minimizes interference and gives the speaker the benefit of the doubt and, subject to certain limited exceptions, generally will not remove or geo-block the visibility of the content without valid legal process requiring it to do so. Additionally, members who post content and those who report content can appeal our content moderation decisions. Our content policies are clear and we apply them equally for all members. Within our Professional Community Policies we provide granular information and examples on what is and what is not allowed on LinkedIn. Furthermore, LinkedIn has automated defences to identify and prevent abuse, including inauthentic behaviour, such as spam, phishing and scams, duplicate accounts, fake accounts, and misinformation. Our Trust and Safety teams work every day to identify and restrict inauthentic activity. We're regularly rolling out scalable technologies like machine learning models to keep our platform safe.
--------------------------	--

SLI 18.2.1 - actions taken in response to policy violations	Methodology of data measurement: The table below reports metrics concerning content LinkedIn removed from its platform as Misinformation, pursuant to the policy outlined in QRE 18.2.1 above. The metrics include: – the number of pieces of content removed as Misinformation between 1 January – 30 June 2026, broken out by EEA Member State; – the number of those content removals that were appealed by the content author; – the number of those appeals that were granted; – the median time from appeal-to-appeal decision for those appeals. The metrics are assigned to EEA Member State based on the IP address of the of the content author.			
	The number of pieces of content removed as Misinformation between 1 January – 30 June 2026	The number of removals that were appealed by the content author	The number of appeals that were granted	The median time from appeal-to-appeal decision in hours

V. Empowering Users

Commitment 19

Relevant Signatories using recommender systems commit to make them transparent to the recipients regarding the main criteria and parameters used for prioritising or deprioritising information, and provide options to users about recommender systems, and make available information on those options.

In line with this commitment, did you deploy new implementation measures (e.g. changes to your terms of service, new tools, new policies, etc)? [Yes/No]	Yes
If yes, list these implementation measures here [short bullet points].	New implementation Measures Additional materials published to provide transparency to users on recommender systems.
Do you plan to put further implementation measures in place in the next 6 months to substantially improve the maturity of the implementation of this commitment? [Yes/No]	No
If yes, which further implementation measures do you plan to put in place in the next 6 months?	Planned Implementation Measures LinkedIn will continue to publish new materials to provide transparency to users on recommender systems.

Measure 19.1	
QRE 19.1.1	LinkedIn has published, and continues to publish, a variety of articles and other content to explain to users how our recommender systems work and how members can tailor their experiences on the LinkedIn platform, including: “Keeping conversations real on LinkedIn”; “Updates to The LinkedIn Feed Focusing on Authentic, Relevant Conversations”; “Mythbusting the Feed: How the Algorithm Works”; “Keeping your feed relevant and productive”; “Guide: Features to Help You Control Your Feed and Conversations”; “Our approach to building transparent and explainable AI systems”; “Guide: Features to Help You Control Your Feed and Conversations”; “Suggested Posts in Feed”; “Understanding how the LinkedIn Feed works”; “The Tools to Help You Tailor Your LinkedIn Feed Experience”; “How Does the LinkedIn Feed Work?”; “LinkedIn: Where Real Conversations Matter”. During earlier reporting periods LinkedIn collated and expanded upon existing resources to further explain the main parameters of LinkedIn recommender systems and options provided to users to influence and control these recommender systems. Additionally, LinkedIn addresses automated processing and relevancy in the LinkedIn User Agreement and it includes a link to the above referenced Help Centre article in Section 3.6 of the LinkedIn User Agreement, which section focuses on recommendations and automated processing. During an earlier reporting period, LinkedIn launched a new setting for members to control the default for how their LinkedIn feed is presented to them. Members can now change their preferred feed view from “most relevant first” to “most recent first”. “Most relevant first” means that LinkedIn will use data from the member’s profile and LinkedIn activity data to rank feed content based on the member’s interests. “Most recent first” means that LinkedIn will not use the member’s profile and LinkedIn activity data to rank feed content and will instead show updates from the member’s network in reverse chronological order. As reported in an earlier report, in August 2023, LinkedIn launched two experiences in the EU. Additional detail is included below: • LinkedIn launched a revised and expanded experience to enable Members to change how their Feed experience is presented to them. The choice is presented in the Feed (on desktop, mobile app, and mobile web) and it also points members to the setting referenced above where members can change the default sort of their Feed. Members can toggle between the following two choices: “most relevant first” or “most recent first.” The default sort option is “most relevant first.” If the Member toggles to “most recent first,” that choice will only persist for the current feed view on that particular device. • LinkedIn also launched a new setting within a Member’s Account Preferences settings so Members can change the default sort option from “most relevant first” to “most recent first.” Changing that setting will persist across sessions and devices. Members can learn more about this experience and the setting in our Help Center.

Measure 19.2		
SLI 19.2.1 – user settings	Methodology of data measurement: Members that do not wish to have their LinkedIn feed experience sorted by relevance can change the default of how their LinkedIn feed experience is sorted via a setting. The table below reports: (1) the number of EEA members who used the “preferred feed view” setting between 1 January – 30 June 2026; and (2) the number of times those members used the “preferred feed view” setting between 1 January – 30 June 2026. The metrics are assigned to EEA Member State based on the self-reported profile location of the member. With respect to Metric (1) below, all Member States, as well as the EU and EEA totals, saw an increase in usage compared to the prior reporting period. With respect to Metric 2 below, all Member States except for Finland, Slovenia, and Liechtenstein saw an increase in usage compared to the prior reporting period. The EU and EEA totals also saw an increase in usage compared to the prior reporting period.	
	No of times users actively engaged with the “preferred feed view” setting	
Data	(1) The number of EEA members who used the “preferred feed view” setting between 1 January – 30 June 2026	(2) The number of times the members used the “preferred feed view” setting between 1 January – 30 June 2026

V. Empowering Users

Commitment 20

Relevant Signatories commit to empower users with tools to assess the provenance and edit history or authenticity or accuracy of digital content.

In line with this commitment, did you deploy new implementation measures (e.g. changes to your terms of service, new tools, new policies, etc)? [Yes/No]	No
--	----

If yes, list these implementation measures here [short bullet points].	New implementation Measures Not applicable
Do you plan to put further implementation measures in place in the next 6 months to substantially improve the maturity of the implementation of this commitment? [Yes/No]	No
If yes, which further implementation measures do you plan to put in place in the next 6 months?	Planned Implementation Measures Not applicable
Measure 20.1	<i>Not subscribed</i>
Measure 20.2	
QRE 20.2.1	LinkedIn has adopted the C2PA 's industry-leading "Content Credentials" technology to include metadata labelling, including data about whether content is created using AI, on content containing the C2PA technology. LinkedIn has also published an article in its Help Center which provides more information on C2PA and Content Credentials.

V. Empowering Users

Commitment 21 - ***Not subscribed***

V. Empowering Users

Commitment 22 - ***Not subscribed***

V. Empowering Users	
Commitment 23	
Relevant Signatories commit to provide users with the functionality to flag harmful false and/or misleading information that violates Signatories policies or terms of service.	
In line with this commitment, did you deploy new implementation measures (e.g. changes to your terms of service, new tools, new policies, etc)? [Yes/No]	No
If yes, list these implementation measures here [short bullet points].	New implementation Measures Not applicable
Do you plan to put further implementation measures in place in the next 6 months to substantially improve the maturity of the implementation of this commitment? [Yes/No]	No
If yes, which further implementation measures do you plan to put in place in the next 6 months?	Planned Implementation Measures Not applicable
Measure 23.1	
QRE 23.1.1	If LinkedIn users locate content they believe violates our Professional Community Policies, we encourage them to report it using the in-product reporting mechanism represented by the three dots in the upper right-hand corner of the content itself on LinkedIn or the “More” button on the Profile headline. Misinformation is specifically called out as one of the reporting options. The reporting feature is available through, and largely identical across, LinkedIn’s website and mobile app, although reporting reasons and their visual presentation may vary slightly for certain types of content. In most instances, the reporting process is located just one click away from the content being reported and, depending on whether content is reported in the LinkedIn App or on desktop, the reporting process takes a few clicks to complete.

	Reported content generally is reviewed by trained content reviewers. In addition, LinkedIn uses automation to flag potentially violative content to our content moderation teams. If reported or flagged content violates the Professional Community Policies, it will be actioned in accordance with our policies. When members use the above reporting process, they will receive an email acknowledging receipt of the report. The email includes a link to a notice page and instructions advising the reporter can use the link to find information about the current status of their report (including LinkedIn's decision whether to action the reported content). LinkedIn updates the notice page in near real time, and LinkedIn's decision provides the opportunity to appeal.
Measure 23.2	
QRE 23.2.1	As noted in our response to QRE 23.1.1, content that is flagged as misinformation (whether reported or automatically detected) is removed from LinkedIn. LinkedIn has a quality assurance team that is dedicated to ensure the quality of our content review processes and decisions. For example, the quality assurance team performs quality checks, on a routine basis, the content moderation decisions that have previously been made. This also allows us to improve our processes and further strengthen our platform as a trusted source of information. Furthermore, as a real identity professional network, LinkedIn acts vigilantly to maintain the integrity of all accounts and to ward off bot and false account activity. LinkedIn enforces the policies in its User Agreement prohibiting the use of "bots or other unauthorized automated methods to access the Services, add or download contacts, send or redirect messages, create, comment on, like, share, or re-share posts, or otherwise drive inauthentic engagement" through: • Maintaining a dedicated Anti-Abuse team to research emerging trends and key risks and develop tools to address them • Using AI to detect inauthentic activity and communities of fake accounts • Using automated systems detect and block automated activity • Conducting manual investigation and restriction of accounts engaged in automated activity • Maintaining 24/7 escalation paths to address any emerging issues.

V. Empowering Users**Commitment 24**

Relevant Signatories commit to inform users whose content or accounts has been subject to enforcement actions (content/accounts labelled, demoted or otherwise enforced on) taken on the basis of violation of policies relevant to this section (as outlined in Measure 18.2), and provide them with the possibility to appeal against the enforcement action at issue and to handle complaints in a timely, diligent, transparent, and objective manner and to reverse the action without undue delay where the complaint is deemed to be founded.

In line with this commitment, did you deploy new implementation measures (e.g. changes to your terms of service, new tools, new policies, etc)? [Yes/No]	No
If yes, list these implementation measures here [short bullet points].	New implementation Measures Not applicable
Do you plan to put further implementation measures in place in the next 6 months to substantially improve the maturity of the implementation of this commitment? [Yes/No]	No
If yes, which further implementation measures do you plan to put in place in the next 6 months?	Planned Implementation Measures Not applicable
Measure 24.1	
QRE 24.1.1	LinkedIn removes “specific claims, presented as fact, that are demonstrably false or substantially misleading and likely to cause harm.” In such circumstances, the author whose content we’ve actioned will generally be notified when we take action, except in certain limited circumstances like, for example, where the content at issue is deceptive high volume commercial content (e.g., fraudulent) or LinkedIn is prohibited from providing notice. Notices are typically sent by email and contain a link to a notice page containing certain additional information (e.g., about the content at issue, the policy violated, the action LinkedIn has taken, redress info and a link to allow the individual to appeal LinkedIn’s decision). In order to submit an appeal, the member must confirm that they have read the relevant LinkedIn policy (a link is provided to the relevant policy, for example, LinkedIn’s policy on false and misleading information) and confirm that having reviewed the content at issue, they

	believe it complies with the policy. LinkedIn reviews those appeals and notifies the member of its appeal decision. If the appeal is successful, we put the content back up on LinkedIn.			
	Appeals made by members are treated the same regardless of whether they use LinkedIn's premium services.			
SLI 24.1.1 - enforcement actions	Methodology of data measurement (where appropriate insights on data provided)			
	The table below reports metrics concerning content LinkedIn removed from its platform as Misinformation, pursuant to the policy outlined in QRE 18.2.1. The metrics include: - (1) the number of pieces of content removed as Misinformation between 1 January – 30 June 2026, broken out by EEA Member State; - (2) the number of those content removals that were appealed by the content author; - (3) the number of those appeals that were granted; - (4) the median time from appeal to appeal decision for those appeals. The metrics are assigned to EEA Member State based on the IP address of the of the content author.

Commitment 28

Relevant Signatories commit to support good faith research into Disinformation that involves their services.

In line with this commitment, did you deploy new implementation measures (e.g. changes to your terms of service, new tools, new policies, etc)? [Yes/No]	No
If yes, list these implementation measures here [short bullet points].	New implementation Measures Not applicable.
Do you plan to put further implementation measures in place in the next 6 months to substantially improve the maturity of the implementation of this commitment? [Yes/No]	Yes
If yes, which further implementation measures do you plan to put in place in the next 6 months?	Planned Implementation Measures Ongoing review of researcher feedback and needs may result in additional measures and resources being made available.
Measure 28.1	
QRE 28.1.1	LinkedIn facilitates research, engages with the research community, and provides data to the research community in a variety of ways, as described below. Historically, LinkedIn's work with external stakeholders, including, for example, research institutes, and academia, to understand the rapidly changing world of work through access to and use of LinkedIn data. Additionally, LinkedIn employs academics to gain practical experience combining industry knowledge with

	academic expertise to solve complex business problems spanning all areas of engineering, with an initial focus on artificial intelligence (including work related to large recommender systems and deep learning algorithms) and data science. While the foregoing work remains critical to our mission, we are also working to provide access to data for research purposes consistent with the goals of the CoP as well as the applicable requirements of the DSA. LinkedIn also has in place the needed teams and tools to make data available to researchers in a variety of ways, including via Excel or XML files, GitHub repositories, sandboxed laptops, and APIs.
Measure 28.2	
QRE 28.2.1	LinkedIn supports the aims of the research community and regularly provides information and data to the research community in a variety of ways. To date, we have made non-personal, aggregated data publicly available (data on gender equity in the workplace, data on green skills and jobs, data on industry and job skills, and data on engagement with labor markets and employment trends). Our goal with this action is to enable researchers to understand the rapidly changing world of work through access to and use of LinkedIn data. Because much of our data is publicly available, the extent to which such data has been used by others for disinformation-related research purposes cannot easily be ascertained. Additionally, LinkedIn is expanding its API access for public data for disinformation related research purposes. Information about the LinkedIn APIs is available to the public and researcher access is provided here. For access to LinkedIn APIs, a researcher needs to submit an application, meet criteria for approval and provide additional information necessary for us to assess their project. APIs including non-public data may be made available for research purposes based on special requests and the ability of the researcher to protect personal data pursuant to GDPR and relevant intellectual property rights. Upon approval, the researcher's application will be provisioned with the relevant APIs. In addition, access is available to anyone who visits the relevant LinkedIn site. For access to other data, researchers may be provided with datasets and information as part of research inquiries and research partnerships with LinkedIn. Researchers may contact LinkedIn to discuss research opportunities.

Measure 28.3	
QRE 28.3.1	We look forward to partnering with other relevant signatories on this project and will provide further reporting as the annual consultation is established.

VIII. Transparency Centre

Commitments 34 - 36

VIII. Transparency Centre	
Commitment 34	
To ensure transparency and accountability around the implementation of this Code, Relevant Signatories commit to set up and maintain a publicly available common Transparency Centre website	
In line with this commitment, did you deploy new implementation measures (e.g. changes to your terms of service, new tools, new policies, etc)? [Yes/No]	No
If yes, list these implementation measures here [short bullet points].	New implementation Measures Not applicable.
Do you plan to put further implementation measures in place in the next 6 months to substantially improve the maturity of the implementation of this commitment? [Yes/No]	Yes
If yes, which further implementation measures do you plan to put in place in the next 6 months?	Planned Implementation Measures LinkedIn is committed to the proper functioning of the Transparency Center website and will therefore continue its engagement in the Transparency Center Subgroup.
Measure 34.1	
Measure 34.2	
Measure 34.3	
Measure 34.4	
Measure 34.5	

VIII. Transparency Centre	
Commitment 35	
Signatories commit to ensure that the Transparency Centre contains all the relevant information related to the implementation of the Code's Commitments and Measures and that this information is presented in an easy-to-understand manner, per service, and is easily searchable.	
In line with this commitment, did you deploy new implementation measures (e.g. changes to your terms of service, new tools, new policies, etc)? [Yes/No]	Yes
If yes, list these implementation measures here [short bullet points].	New implementation Measures LinkedIn will upload its September 2026 Report to the Transparency Centre website.
Do you plan to put further implementation measures in place in the next 6 months to substantially improve the maturity of the implementation of this commitment? [Yes/No]	No
If yes, which further implementation measures do you plan to put in place in the next 6 months?	Planned Implementation Measures Not applicable

Measure 35.3	
Measure 35.4	
Measure 35.5	Not subscribed
Measure 35.6	

VIII. Transparency Centre
Commitment 36 - Not subscribed

IX. Permanent Task-Force

Commitment 37

IX. Permanent Task-Force

Commitment 37

Signatories commit to participate in the permanent Task-force. The Task-force includes the Signatories of the Code and representatives from EDMO and ERGA. It is chaired by the European Commission, and includes representatives of the European External Action Service (EEAS). The Task-force can also invite relevant experts as observers to support its work. Decisions of the Task-force are made by consensus.

In line with this commitment, did you deploy new implementation measures (e.g. changes to your terms of service, new tools, new policies, etc)? [Yes/No]	Yes
If yes, list these implementation measures here [short bullet points].	New implementation Measures LinkedIn has actively engaged in and contributed to the work of the Task-force and relevant Subgroups and Working Groups that were active during the reporting period.
Do you plan to put further implementation measures in place in the next 6 months to substantially improve the maturity of the implementation of this commitment? [Yes/No]	Yes
If yes, which further implementation measures do you plan to put in place in the next 6 months?	Planned Implementation Measures LinkedIn is committed to continuing its active engagement in and contribution to the Task-force in the upcoming six-month period. During that period, LinkedIn is also committed to continuing its active engagement in and contributions to Subgroups and Working Groups that are active during the period, to the extent they pertain to Measures to which LinkedIn Ireland has subscribed in its Subscription Document.

Measure 37.1	
Measure 37.2	Per LinkedIn Ireland's Subscription Document dated 15 January 2025, LinkedIn will commit to perform the obligations outlined in this Measure to the extent they pertain to the other Measures to which LinkedIn has subscribed under its Subscription Document and in a manner and level that is proportional to LinkedIn's risk profile with respect to disinformation.
Measure 37.3	
Measure 37.4	
Measure 37.5	
Measure 37.6	
QRE 37.6.1	LinkedIn actively engaged in and participated in all plenary meetings of the Task-Force and all meetings of the Elections Working group which was the only working group or sub-group active during the reporting period. LinkedIn also notes that the Elections Rapid Response Systems was activated for relevant elections in Portugal, Slovenia, Denmark, Bulgaria, Hungary, Cyprus and Malta.

X. Monitoring of Code

Commitment 38 - 44

X. Monitoring of Code	
Commitment 38	
The Signatories commit to dedicate adequate financial and human resources and put in place appropriate internal processes to ensure the implementation of their commitments under the Code.	
In line with this commitment, did you deploy new implementation measures (e.g. changes to your terms of service, new tools, new policies, etc)? [Yes/No]	No
If yes, list these implementation measures here [short bullet points].	New implementation Measures Not applicable.
Do you plan to put further implementation measures in place in the next 6 months to substantially improve the maturity of the implementation of this commitment? [Yes/No]	No
If yes, which further implementation measures do you plan to put in place in the next 6 months?	Planned Implementation Measures Not applicable
Measure 38.1	
QRE 38.1.1	LinkedIn has a dedicated team to ensure proper tracking and compliance with the Code of Practice, consisting of members of our legal, public policy, content policy and data science teams. Furthermore, as noted elsewhere in this report, LinkedIn had approximately 1,364 content moderators globally (for 24/7 coverage), as of 30 June 2026, and includes specialists in a number of EEA languages. LinkedIn's in-house Editorial team also provides members with trustworthy content regarding global events.

X. Monitoring of Code
Commitment 39 - <i>Not subscribed</i>

X. Monitoring of Code

Commitment 40

Signatories commit to provide regular reporting on Service Level Indicators (SLIs) and Qualitative Reporting Elements (QREs). The reports and data provided should allow for a thorough assessment of the extent of the implementation of the Code's Commitments and Measures by each Signatory, service and at Member State level.

In line with this commitment, did you deploy new implementation measures (e.g. changes to your terms of service, new tools, new policies, etc)? [Yes/No]	No
If yes, list these implementation measures here [short bullet points].	New implementation Measures Not applicable
Do you plan to put further implementation measures in place in the next 6 months to substantially improve the maturity of the implementation of this commitment? [Yes/No]	No
If yes, which further implementation measures do you plan to put in place in the next 6 months?	Planned Implementation Measures Not applicable
Measure 40.1	
Measure 40.2	<i>Not subscribed</i>
Measure 40.3	
Measure 40.4	
Measure 40.5	
Measure 40.6	

X. Monitoring of CodeCommitment 41 - ***Not subscribed***

X. Monitoring of Code**Commitment 42**

Relevant Signatories commit to provide, in special situations like elections or crisis, upon request of the European Commission, proportionate and appropriate information and data, including ad-hoc specific reports and specific chapters within the regular monitoring, in accordance with the rapid response system established by the Taskforce.

In line with this commitment, did you deploy new implementation measures (e.g. changes to your terms of service, new tools, new policies, etc)? [Yes/No]	Yes
If yes, list these implementation measures here [short bullet points].	New implementation Measures During the reporting period, LinkedIn participated in the Task-force's Elections Working Group. As part of the Elections Working Group under this Code, the Elections Rapid Response System was activated for relevant elections in Portugal, Slovenia, Denmark, Bulgaria, Hungary, Cyprus and Malta.
Do you plan to put further implementation measures in place in the next 6 months to substantially improve the maturity of the implementation of this commitment? [Yes/No]	Yes
If yes, which further implementation measures do you plan to put in place in the next 6 months?	Planned Implementation Measures LinkedIn will continue its participation in the relevant sub-groups under the Task-force.

X. Monitoring of Code	
Commitment 43	
Signatories commit to produce reports and provide data following the harmonised reporting templates and refined methodology for reporting and data disclosure, as agreed in the Task-force.	
In line with this commitment, did you deploy new implementation measures (e.g. changes to your terms of service, new tools, new policies, etc)? [Yes/No]	Yes
If yes, list these implementation measures here [short bullet points].	New implementation Measures LinkedIn has provided its September 2026 Report in accordance with the revised Harmonised Reporting Template and underlying methodologies as jointly developed by Signatories in the Monitoring and Reporting Subgroup under the Code's Task-force.
Do you plan to put further implementation measures in place in the next 6 months to substantially improve the maturity of the implementation of this commitment? [Yes/No]	Yes
If yes, which further implementation measures do you plan to put in place in the next 6 months?	Planned Implementation Measures LinkedIn will continue its engagement in the respective Task-force Subgroups to keep the Harmonised Reporting Template and underlying methodologies up to date, where necessary in view of its experience with reporting.

Reporting on the service's response during a period of crisis

Reporting on the service's response during a crisis		
War of aggression by Russia on Ukraine		
Threats observed or anticipated at time of reporting: LinkedIn is an online professional networking site with a real identity requirement, which means that content posted by our members is visible to that member's professional network, including colleagues, managers, and potential future employers. As a result of LinkedIn's professional context, our members do not tend to post misinformation, nor does misinformation content gain traction on LinkedIn. Nonetheless, LinkedIn may be subject to certain members inadvertently posting misinformation during crisis situations.		
Mitigations in place at time of reporting: LinkedIn's Professional Community Policies expressly prohibit false and misleading content, including misinformation and disinformation, and its in-house Editorial team provides members with trustworthy content regarding global events, including the war in Ukraine. LinkedIn had approximately 1,364 content moderators globally (for 24/7 coverage), as of 30 June 2026, and includes specialists in a number of languages including English, German, French, Russian, and Ukrainian. These reviewers use policies and guidance developed by a dedicated content policy team and experienced lawyers, and work with external fact checkers as needed. When LinkedIn sees content or behaviour that violates its Professional Community Policies, it takes action, including for example the removal of content. LinkedIn has been banned in Russia since 2016 and has implemented the European bans on Russian state media. In addition to not operating in Russia, political ads are banned on LinkedIn, which includes prohibitions on ads that exploit a sensitive political issue, including the current Russia-Ukraine war. LinkedIn continues to mature its crisis response processes as applicable including 1) quickly coordinating with industry peers regarding the exchange of threat indicators; 2) engaging with external stakeholders regarding trends and TTPs; 3) continuously providing updated policy guidance to internal teams to assist with the removal of misinformation; and 4) continuing to proactively provide localised trustworthy information to our members. LinkedIn has continued to mature its crisis response playbook by continually monitoring crisis situations globally, expanding internal teams that work on crisis response, and maturing our processes to respond more efficiently and effectively to crisis situations. LinkedIn will continue to follow its processes related to the removal of misinformation, and continually increase investments in resource allocation and process improvements where necessary to respond to the demands of the crisis.		
[Note: Signatories are requested to provide information relevant to their particular response to the threats and challenges they observed on their service(s). They ensure that the information below provides an accurate and complete report of their relevant actions. As operational responses to crisis/election situations can vary from service to service, an absence of information should not be considered a priori a shortfall in the way a particular service has responded. Impact metrics are accurate to the best of signatories' abilities to measure them].		
Policies and Terms and Conditions		
Outline any changes to your policies		
Policy	Changes (such as newly introduced)	Rationale

	policies, edits, adaptation in scope or implementation)	
False or misleading content	LinkedIn continually updates its policies as appropriate during any crisis, including the Ukraine crisis.	Misinformation, disinformation campaigns, coordinated manipulative behaviours, malicious use of advertising products, and the involvement of foreign state actors, are all harms that existed prior to the Ukraine crisis, and therefore LinkedIn already had policies in place to address these harms.
Scrutiny of Ads Placements		
Outline approaches pertinent to this chapter, highlighting similarities/commonalities and differences with regular enforcement.		
Specific Action applied (with reference to the Code’s relevant Commitment and Measure)	Description of intervention Political ads are banned on LinkedIn, which includes prohibitions on ads that exploit a sensitive political issue.	
	Indication of impact (at beginning of action: expected impact) including relevant metrics when available Not applicable	
Political Advertising

relevant Commitment and Measure)	Not applicable. Political ads are banned on LinkedIn, which includes prohibitions on ads that exploit a sensitive political issue.
	Indication of impact (at beginning of action: expected impact) including relevant metrics when available Not applicable
Integrity of Services	
Outline approaches pertinent to this chapter, highlighting similarities/commonalities and differences with regular enforcement.	
Specific Action applied (with reference to the Code's relevant Commitment and Measure)	Description of intervention LinkedIn's Professional Community Policies prohibit misinformation, and misinformation is removed from the LinkedIn platform. Members that post misinformation are notified of LinkedIn's removal of their content. State-sponsored attempts to post misinformation, if any, are removed. LinkedIn also maintains a robust ad-review process to prevent malicious advertising wherein ads related to crises, including the Ukraine war, are manually reviewed and approved by our internal team. LinkedIn regularly exchanges information with industry peers to identify and share granular information related to manipulative behaviours, coordinated influence operations, and TTPs. All such content that violates LinkedIn's Professional Community Policies is removed.
	Indication of impact (at beginning of action: expected impact) including relevant metrics when available LinkedIn does not track misinformation content removal by subject matter, and a comprehensive listing of its misinformation content takedowns is provided in this disclosure and in its Transparency Report. See also SLI 18.2.1. Impact metrics for malicious advertising removals are available in SLI 2.1.1 and 2.3.1, whereas metrics related to manipulative behaviors and TTPs are available in SLI 12.1.1 and 14.2.1.
Empowering Users	
Outline approaches pertinent to this chapter, highlighting similarities/commonalities and differences with regular enforcement.	

Specific Action applied (with reference to the Code's relevant Commitment and Measure)	Description of intervention LinkedIn has an internal team of global news editors that provides trustworthy and authoritative content to its member-base at all times. During important events in the Ukraine crisis, this team provides manually curated and localised storylines.
	Indication of impact (at beginning of action: expected impact) including relevant metrics when available

Reporting on the service's response during a crisis

Israel-Hamas Conflict

Threats observed or anticipated at time of reporting:

LinkedIn is an online professional networking site with a real identity requirement, which means that content posted by our members is visible to that member's professional network, including colleagues, managers, and potential future employers. As a result of LinkedIn's professional context, our members come to LinkedIn for economic opportunity, and as such, do not tend to post misinformation, nor does misinformation content gain traction on LinkedIn. Nonetheless, LinkedIn may be subject to certain members inadvertently posting misinformation during crisis situations.

Mitigations in place at time of reporting:

LinkedIn's Professional Community Policies expressly prohibit false and misleading content, including [misinformation and disinformation](#), and its in-house Editorial team provides members with trustworthy content regarding global events, including the Israel-Hamas conflict. LinkedIn had approximately 1,364 content moderators globally (for 24/7 coverage), as at 30 June 2026, and includes specialists in languages supported on LinkedIn. These reviewers use policies and guidance developed by a dedicated content policy team and experienced lawyers, and work with external fact checkers as needed. When LinkedIn sees content or behaviour that violates its Professional Community Policies, it takes action, including for example the removal of content. Political ads are banned on LinkedIn, which includes prohibitions on ads that exploit a sensitive political issue, including the current Israel-Hamas conflict.

LinkedIn continues to mature its crisis response processes as applicable including 1) quickly coordinating with industry peers regarding the exchange of threat indicators; 2) engaging with external stakeholders regarding trends and TTPs; 3) continuously providing updated policy guidance to internal teams to assist with the removal of misinformation; and 4) continuing to proactively provide localised trustworthy information to our members.

LinkedIn has continued to mature its crisis response playbook by continually monitoring crisis situations globally, expanding internal teams that work on crisis response, and maturing our processes to respond more efficiently and effectively to crisis situations. LinkedIn will continue to follow its processes related to the removal of misinformation, and continually increase investments in resource allocation and process improvements where necessary to respond to the demands of the crisis.

Reporting on the service's response during an election

Reporting on the service's response during an election

European national elections (Portugal, Slovenia, Denmark, Bulgaria, Hungary, Cyprus and Malta)

Threats observed during the electoral period:

LinkedIn is an online professional networking site with a real identity requirement, which means that content posted by our members is visible to that member's professional network, including colleagues, managers, and potential future employers. As a result of LinkedIn's professional context, our members come to LinkedIn for economic opportunity, and as such, do not tend to post misinformation, nor does misinformation content gain traction on LinkedIn. Nonetheless, LinkedIn may be subject to certain members inadvertently posting misinformation during elections.

Mitigations in place during the electoral period:

LinkedIn's Professional Community Policies expressly prohibit false and misleading content, including [misinformation and disinformation](#), and its in-house Editorial team provides members with trustworthy content regarding global events, including as applicable European national elections in Portugal, Slovenia, Denmark, Bulgaria, Hungary, Cyprus and Malta. LinkedIn had approximately 1,364 content moderators globally (for 24/7) coverage, as at 30 June 2026, and includes specialists in a number of languages. These reviewers use policies and guidance developed by a dedicated content policy team and experienced lawyers, and work with external fact checkers as needed. When LinkedIn sees content or behaviour that violates its Professional Community Policies, it takes action, including for example the removal of content.

Political ads are banned on LinkedIn, which includes prohibitions on ads that exploit a sensitive political issue, including European Elections.

LinkedIn continues to mature its crisis response processes as applicable. In addition to the increase in resource allocation and process improvements, best practices include: 1) quickly coordinating with industry peers regarding the exchange of threat indicators; 2) engaging with external stakeholders regarding trends and TTPs; 3) continuously providing updated policy guidance to internal teams to assist with the removal of misinformation; and 4) continuing to proactively provide localised trustworthy information to our members.

LinkedIn has continued to mature its crisis response playbook by continually monitoring crisis situations globally, expanding internal teams that work on crisis response, and maturing our processes to respond more efficiently and effectively to crisis situations. LinkedIn will continue to follow its processes related to the removal of misinformation, and continually increase investments in resource allocation and process improvements where necessary to respond to the demands of the crisis.

LinkedIn has also implemented a specialized intake and operations process for the Elections Rapid Response System, as applicable for European national elections. During the period covered by this report, the Elections Rapid Response System was activated for relevant elections in Portugal, Slovenia, Denmark, Bulgaria, Hungary, Cyprus and Malta. LinkedIn did not receive any notifications through the Elections Rapid Response System in connection with any of these elections.

[Note: Signatories are requested to provide information relevant to their particular response to the threats and challenges they observed on their service(s). They ensure that the information below provides an accurate and complete report of their relevant actions. As operational responses to crisis/election situations can vary from service to

service, an absence of information should not be considered a priori a shortfall in the way a particular service has responded. Impact metrics are accurate to the best of signatories’ abilities to measure them].
