Executive summary

DOT Europe promoted the Code among its different member companies and provided information on the processes to join and what to expect from the work on the Strengthened Code of Practice (now Code of Conduct).

Guidelines for filling out the report

Reports are detailing how signatories have implemented their Commitments under the Code and signatories commit to provide regular reporting on Service Level Indicators (SLIs) and Qualitative Reporting Elements (QREs). The reports and data provided should allow for a thorough assessment of the extent of the implementation of the Code's Commitments and Measures by each signatory.

Reporting period

The reporting period to be covered in the reports is 12 months (1 January – 31 December 2024) for signatories who are not offering very large online platform services. Signatories shall submit reports outlining policy updates and actions taken to implement the Commitments and Measures they signed up to under the Code. All data and policy updates should be reported for 12 months period from the submission of last reports.

Adjusting the reporting template

Signatories who are not offering very large online platform services can adapt the template to specific commitments and measures they subscribed to. This may include adapted wording for commitments, measures, QREs and SLIs. Relevant signatories will report only on commitments and measures they subscribed to and provide Member State-level data only if feasible.

Reporting per Service

When filling in a report for several services, use colour codes to clearly distinguish between services. At the beginning of the report, clarify what colour is used for which service.

Reporting in text form

Reporting in the form of written text is required for several parts of the report. Most of them are accompanied by a target character limit. Please stick to the target character limit as much as possible. We encourage you to use bullet points and short sentences. When providing information to the QRE, please make sure that your answer covers all the elements of the associated commitment and measure. Links should only be used to provide examples or to illustrate the point. They should not be used to replace explanations or to provide data in the forms. All relevant explanations and data must be included in the report directly, in written form.

Reporting SLIs and data

Reporting on SLIs requires quantitative information to be reported on in this harmonised reporting template.

- Where relevant and feasible, SLIs should be reported on per Member State.
- If no data is available on Member State level, SLIs might, instead, be exceptionally reported on per language. (NB that signatories agreed to revisit this issue after the first reporting, to ensure harmonised and meaningful reporting.)
- Please report data in the format provided by the harmonised reporting template, not through external links. Please use the Member State/language template provided in the harmonised reporting template. Where the table asks for "Other relevant metrics", please name the metric that you would like to report on in addition to the ones already provided. You may include more than the number of additional fields provided where necessary; in that case, please adjust the table as needed.
- Please contextualize all data as much as possible, i.e. include baseline quantitative information that will help contextualize the SLIs (e.g. number of pieces of content labelled out of what volume of content).
- If there are no relevant metrics to report on, please leave the respective columns blank.

Reporting on TTPs

If subscribed to Commitment 14, Integrity of Services, we ask you to report on each identified TTP individually. The number of identified TTPs may vary per service. Where more than one TTP are reported under the same action, clarify the reasoning in the methodology. Where input is not provided, keep the placeholder for the relevant TTP and explain reasons and planned remedial action. Additionally, as with all other SLIs, data can be provided per Member State for each individual TTP.

Missing Data

In case that at the time of reporting there is no data available yet, the data is insufficient, or the methodology is lacking, please outline in the dedicated field (i.e. in the field about further implementation measures planned) how this will be addressed over the upcoming six months, being as specific as possible.

Signatories are encouraged to provide insights about the data/numbers they provide by inserting possible explanations in the boxes of the template "*Methodology of data measurement & insights on data provided*". This should aim to explain the why of what is being reported, for instance - *Are there trends or curiosities that could require or use contextual explanation? What may be driving the change or the difference in the number?* Please also indicate inconsistencies or gaps regarding methodology in the dedicated box.

Attachments

We ask you not to enclose any additional attachments to the harmonised reporting template.

Crisis and elections reporting template

Relevant signatories are asked to provide proportionate and appropriate information and data during a period of crisis and during an election. Reporting is a part of a special chapter at the end of the harmonised reporting template and should follow the guidelines:

- The reporting of signatories' actions should be as specific to the particular crisis or election reported on as possible. To this extent, the rows on "Specific Action[s]" should be filled in with actions that are either put in place specifically for a particular event (for example a media literacy campaign on disinformation related to the Ukraine war, an information panel for the elections), or to explain in more detail how an action that forms part of the service's general approach to implementing the Code is implemented in the specific context of the crisis or election reported on (for example, what types of narratives in a particular election/crisis would fall into scope of a particular policy of the service, what forms of advertising are ineligible).
- Regarding elections, signatories are expected to provide specific information on their **experience with the RRS for FR and RO elections**. This can be included in the first two rows ("Threats observed..." / "Mitigations in place ..."). In addition, **regardless of the RRS activation, signatories should report on relevant actions in place for elections at national level** (parliamentary/presidential) in EU Member States during the reporting period – specifying the country(ies) and election(s).
- Signatories who are not offering very large online platform services and who follow the invitation to report on their specific actions for a particular election or crisis may adapt the reporting template as follows:
 - They may remove the "Policies and Terms and Conditions" section of the template, or use it to report on any important changes in their internal rules applicable to a particular election or crisis (for example, a change in editorial guidelines for fact-checkers specific to the particular election or crisis)
 - They may remove any Chapter Section of the Reporting Template (Scrutiny of Ads Placement, Political Advertising, Integrity of Services etc.) that is not relevant to their activities
- The harmonised reporting template should be filled in by adding additional rows for each item reported on. This means that rather than combined/bulk reporting such as "Depending on severity of violation, we demote or remove content based on policies X, Y, Z", there should be individual rows stating for example "Under Policy X, content is demoted or removed based on severity", "Under Policy Y, content [...]" etc.
- The rows should be colour-coded to indicate which service is being reported on, using the same colour code as for the overall harmonised reporting template.

Reporting should be brief and to the point, with a suggested character limit entry of 2000 characters.

Uploading data to the Transparency Centre

The reports should be submitted to the Commission in the form of the pdf via e-mail to the address CNECT COP TASK FORCE CNECT-COP-TASK-FORCE@ec.europa.eu within the agreed deadline. Signatories will upload all data from the harmonised reporting template to the Transparency Centre, allowing easy data access and filtering within the agreed deadline. It is the responsibility of the signatories to ensure that the uploading takes place and is

executed on time. Signatories are also responsible to ensure that the Transparency Centre is operational and functional by the time of the reports' submission that the data from the reports are uploaded and made accessible in the Transparency Centre within the above deadline, and that users are able to read, search, filter and download data as needed in a user-friendly way and format.

II. Scrutiny of Ad Placements

Commitment 1

Relevant signatories participating in ad placements commit to defund the dissemination of disinformation, and improve the policies and systems which determine the eligibility of content to be monetised, the controls for monetisation and ad placement, and the data to report on the accuracy and effectiveness of controls and services around ad placements. This additional Service Level Indicator provides an estimated financial value of the actions taken by Signatories to demonetise disinformation sources (under SLI 1.1.1). It is based on media metrics available to Signatories (query/bid¹ or impression²) and applying an agreed-upon conversion factor provided by a third party designated by the Task-force of the Code (Ebiquity plc.).

IV. Integrity of Services

Commitment 14

In order to limit impermissible manipulative behaviours and practices across their services, Relevant Signatories commit to put in place or further bolster policies to address both misinformation and disinformation across their services, and to agree on a cross-service understanding of manipulative behaviours, actors and practices not permitted on their services. Such behaviours and practices, which should periodically be reviewed in light with the latest evidence on the conducts and TTPs employed by malicious actors, such as the AMITT Disinformation Tactics, Techniques and Procedures Framework, include:

The following TTPs pertain to the creation of assets for the purpose of a disinformation campaign, and to ways to make these assets seem credible:

- 1. Creation of inauthentic accounts or botnets (which may include automated, partially automated, or non-automated accounts)
- 2. Use of fake / inauthentic reactions (e.g. likes, up votes, comments)
- 3. Use of fake followers or subscribers
- 4. Creation of inauthentic pages, groups, chat groups, fora, or domains
- 5. Account hijacking or impersonation

The following TTPs pertain to the dissemination of content created in the context of a disinformation campaign, which may or may not include some forms of targeting or attempting to silence opposing views. Relevant TTPs include:

- 6. Deliberately targeting vulnerable recipients (e.g. via personalized advertising, location spoofing or obfuscation)
- 7. Deploy deceptive manipulated media (e.g. "deep fakes", "cheap fakes"...)
- 8. Use "hack and leak" operation (which may or may not include doctored content)

- 9. Inauthentic coordination of content creation or amplification, including attempts to deceive/manipulate platforms algorithms (e.g. keyword stuffing or inauthentic posting/reposting designed to mislead people about popularity of content, including by influencers)
- 10. Use of deceptive practices to deceive/manipulate platform algorithms, such as to create, amplify or hijack hashtags, data voids, filter bubbles, or echo chambers
- 11. Non-transparent compensated messages or promotions by influencers
- 12. Coordinated mass reporting of non-violative opposing content or accounts
