*DISARM Foundation*

### About the Signatory

*[Provide a description of the Organisation and of the relevant products, activities and services it offers, which are covered by the listed commitments and measures.]*

The DISARM Foundation is a UK based organization that helps people combating online harms by providing a framework of language used to describe influence operations Tactics Techniques and Behaviors. This is useful because it helps organisations to effectively and accurately share information in a standardised format. It also helps defenders make sense of what they're seeing by giving them a checklist of harmful behaviours commonly seen during influence operations. We are the organization that maintains the framework of TTPs originally called AMITT and which is now known as DISARM.

<b>Provide reasoning for the choice of commitments and measures, as well as future plans (if applicable):</b> <b>The DISARM Foundation provides an open source framework of tactics techniques and procedures of malign influence, in order to better support research aimed at limiting malign influence in online communication. As a Foundation we have limited resourcing to dedicate but we are determined to better help the community. As such we feel we are most directly able to help the community by contributing knowledge on the TTPs as part of commitment 14 as AMITT is a direct precursor to DISARM and those TTPs are currently implemented. As part of this we would like to participate in relevant task forces and we are willing to provide reporting on our conduct as stipulated in commitment 37 and 40.</b>
